VOW Members employ over 40,000 Virginians and generate \$23 bn of revenue inside Virginia

## Supply Chain Strategy

Objective: Win the *competition* for the \$80 bn and 10,000 jobs associated with offshore wind supply chain on the East Coast

- Attract major offshore developers, foundation and turbine manufacturers to Virginia
- Engage government and commercial interests in the development of critical supply chain capabilities in Virginia:
  - Port Facilities
  - Survey & Installation Vessels
  - Turbine & Foundation Manufacturing
  - Transport & Logistics
  - Aerospace, Marine & Electrical Engineering
  - Foundation & Turbine Installation and Maintenance
  - Project Financing & Investment
  - Workforce Development & Certifications
  - Technology Innovation, Knowledge Base and Academic Curricula

Present “bid book” to major U.S. and European developers and manufacturers highlighting merits and capabilities of Virginia to support offshore wind development

## Action Items

- Participate in VOW
- Send us your business profile to include in the bid book
- Express your support to federal, state and local officials

# THE VIRGINIA OFFSHORE WIND COALITION

## PROMOTING THE OFFSHORE WIND INDUSTRY IN VIRGINIA

A collage of four images related to offshore wind energy. Top left: A single white wind turbine on the ocean with a small sailboat in the distance. Top right: A long line of white wind turbines stretching across the horizon. Bottom left: A large blue offshore construction vessel with cranes and a red buoy in the foreground. Bottom right: A map of the Virginia coast with a red and purple shaded area indicating a wind farm site, and a scale bar.
